I. Overview of Price Case

The Governors of the United States Postal Service have determined to adjust rates for Market Dominant products. The adjusted rates will take effect at 12:01 a.m. on January 22, 2023. The Postal Service hereby submits the new rates, which have been developed from the most recent agreed-upon analytic principles, for regulatory review and demonstrates their compliance with applicable law.

This price case is the third to follow the amended ratemaking system adopted in Order No. 5763. The Postal Service has available approximately 4.2 percentage points of pricing authority for each class. The Governors have determined to use virtually all of this authority. The Postal Service's Delivering for America plan sets forth a balanced array of initiatives to achieve financial sustainability and service excellence, and price cases are an integral component of that plan.

A. Postal Service Official Responsible for Commission Inquiries

The Postal Service identifies Samie Rehman under 39 C.F.R. § 3030.122(e) as the official available to respond to Commission inquiries:

Samie Rehman, Manager, Pricing
475 L'Enfant Plaza SW, Room 4136
Washington, D.C. 20260

B. Price Case Structure

The remainder of this notice is structured as follows. Part II details compliance with the price cap. Part III discusses the new rates and workshare discounts and their compliance with applicable statutes and regulations, in accordance with 39 C.F.R. § 3030.123(g)–(k). Part IV describes associated changes to the Mail Classification

Schedule (MCS), in accordance with 39 C.F.R. § 3030.122(d). The schedule of new rates can be found in Attachment A, formatted to satisfy that rule.

II. Price Cap Compliance

A. Annual CPI Based Cap Space

Table 1 shows the price cap space generated by the change in the Bureau of Labor Statistics' Consumer Price Index for All Urban Consumers (CPI-U) since the last market-dominant rate case.¹

B. Unused Cap Space from Previous Years

Table 2 shows the banked cap space carried over from prior years.²

Class	Unused Authority (%)

As required under 39 C.F.R. § 3030.123(c), the Postal Service is providing a schedule showing the banked rate adjustment authority available, by class, and the available amount for each of the preceding five years as a library reference accompanying this notice.

C. Density Rate Authority

As specified by 39 C.F.R. § 3030.160(c), density-based rate authority is only available to the Postal Service in the first generally applicable rate adjustment filed after the Commission's determination of that authority. Because the Postal Service used its density-based rate authority in Docket No. R2022-1 following the Commission's determination, no density-based authority is available for this price case.

D. Retirement-Based Rate Authority

As specified by 39 C.F.R. § 3030.181(c), retirement-based rate authority is only available to the Postal Service in the first generally applicable rate adjustment filed after the Commission's determination of that authority. Because the Postal Service used its

² Docket No. R2022-1, Order No. 6188, Order on Price Adjustments for [Market-Dominant Products] and Related Mail Classification Changes (May 27, 2022), at 2 (Table I-1).

retirement-based rate authority in Docket No. R2022-1 following the Commission's determination, no retirement-based authority is available for this price case.

E. Rate Authority for Non-Compensatory Classes

Under 39 C.F.R. § 3030.222(a), the Postal Service receives an additional 2 percentage points of rate authority for any class of mail where the attributable cost for that class exceeded the revenue from that class in the first generally applicable rate adjustment filed after the Commission's determination of that authority. Because the Postal Service used its rate authority for non-compensatory classes in Docket No. R2022-1 following the Commission's determination, rate authority for non-compensatory classes is not available for this price case.

F. Total Available Cap Space

Combining (1) the current CPI based cap space with (2) the unused cap space from previous years, (3) density rate authority, (4) retirement-based rate authority, and (5) rate authority for non-compensatory classes results in the total available cap space in Table 3:³

III. Discussion of New Rates

A. First-Class Mail

1. Summary of Price Changes

First-Class Mail is the highest revenue-generating mail class, accounting for \$23.5 billion, or 30.5 percent, of the \$77.1 billion in total revenue in FY 2021. This class includes correspondence, bills, statements, payments, and advertising.

Table 6 shows the price adjustments for First-Class Mail products:

Table 6
First-Class Mail Price Changes

Product	Percent Change
Single-Piece Letters/Postcards	5.046
Presort Letters/Postcards	3.568
Flats	6.214
Outbound Single-Piece First-Class Mail International	3.694
Inbound Letter Post	6.131
Total First-Class Mail	4.200

Within the Letters product, the rates for one-ounce mail pieces will increase as shown in Table 7:

Table 7
First-Class Mail First-Ounce Rates - Letters

	Current	New	Change	Percent Change
Stamped Single-Piece	\$0.60	\$0.63	\$0.03	5.0
Metered Single-Piece	\$0.57	\$0.60	\$0.03	5.3
MAADC ⁴ Automation	\$0.515	\$0.531	\$0.016	3.1
AADC Automation	\$0.491	\$0.507	\$0.016	3.3
5-Digit Automation	\$0.455	\$0.471	\$0.016	3.5

The Postal Service is increasing the one-ounce stamp price from 60 cents to 63 cents, or 5.0 percent. The one-ounce meter price is increasing by 3 cents, from 57 cents to 60 cents, or 5.3 percent. As a result, the stamp and meter price differential will remain at three cents. In addition to serving as a Single-Piece rate category, the meter price serves as a benchmark for the largest volume and revenue rates categories within First-Class Mail (i.e., Automation Letters). The non-machinable surcharge for Letters

⁴ MAADC stands for Mixed Automated Area Distribution Center (AADC).

will increase slightly from 39 cents to 40 cents, while the additional ounce rate will remain at 24 cents.

Automation Letters, especially 5-Digit Automation Letters, comprise a significant portion of overall First-Class Mail volume and revenue, and 5-Digit Automation Letters volumes are relatively stable. The 5-Digit Automation Letters price will increase 3.5 percent, which is slightly higher than the rate increase for the Automation Letters category as a whole.

As reported in the FY 2021 Annual Compliance Determination, cost coverage for First-Class Mail Flats fell below 100 percent, requiring the Postal Service to increase the price for this product at least 2 percentage points above the class average.⁵ The overall increase for Flats is 6.2 percent, with an overall increase for Single-Piece Flats of 3.1 percent. The price of a one-ounce Single-Piece Flat will remain at twice the price of a Single-Piece Letter for customer convenience, resulting in an increase from \$1.20 to \$1.26 (a 5.0 percent increase). The additional-ounce price of Flats is proposed to remain at 24 cents. Similarly, the Presorted Flats (Automation and Nonautomation) price is proposed to increase 11.2 percent. The 6.2 percent rate increase proposed for First-Class Mail Flats combined with two above-average rate increases of 9.2 percent for the class in Docket No. R2022-1 (implemented on July 10, 2022) and 10.3 percent in Docket No. R2021-2 (implemented on August 29, 2021), is expected to allow Flats product revenue to exceed its cost, turning Flats into a compensatory product.

⁵ 39 C.F.R. § 3030.221; Docket No. ACR2021, Annual Compliance Determination Report, Fiscal Year 2021, Mar. 29, 2022, at 49 (“FY 2021 ACD”).

The remainder of the price authority for First-Class Mail is applied to cards and International letters, cards, and flats. Single-Piece Postcard prices are being raised 4 cents, from 44 cents to 48 cents. Presorted Postcards (Nonautomation and Automation) prices will increase by 6.5 percent. As for international, Inbound Letter Post terminal dues for 2023 are calculated to be increasing by 6.131 percent compared to current rates. Outbound Single-Piece First-Class Mail International (FCMI) prices are increasing 3.694 percent, including increases on Single-Piece FCMI letters, cards, and flats.

2. Workshare Discounts

All First-Class Mail passthroughs comply with the Commission's rules in 39 C.F.R. part 3030, subpart J. Out of 16 passthroughs⁶ in First-Class Mail, nine passthroughs are exactly 100 percent (up from 8 passthroughs in Docket No. R2022-1), six passthroughs are between 85 and 100 percent, and one passthrough is below 85 percent (Nonautomation Machinable Mixed AADC Letters). The single passthrough below 85 percent is discussed below.

a. Nonautomation Machinable Mixed AADC Letters

The Postal Service will increase the discount of 4.4 cents by 22.7 percent (to 5.4 cents), resulting in a passthrough of 84.4 percent. Although this workshare discount is set below the avoided cost for the Postal Service, this proposed workshare discount has been raised by more than 20 percent of the existing workshare discount, satisfying 39 C.F.R. § 3030.284(c). This discount allows the Postal Service to adopt a balanced

⁶ That is, the percentage ratio of a discount to the corresponding avoided cost. See 39 C.F.R. § 3030.281.

approach in the pricing of First-Class Mail and avoid potential rate anomalies, including the possibility that Nonautomation Machinable AADC Letters would feature a lower price than Automation Machinable Letters.

3. Adjustments to Billing Determinants

The Postal Service has made two adjustments to the hybrid-year billing determinants for First-Class Mail.

First, the Postal Service adjusted Nonautomation Presort Letters and DVD volumes to account for the revised pricing structures. Specifically, Nonautomation Machinable Letters and DVD volumes were distributed between Mixed AADC and AADC; and Nonmachinable Letters volumes were distributed to Mixed ADC, 3-Digit, and 5-Digit presort levels. The distribution keys were derived using data from the FY 2021 ACR Folder 10.

Second, because the Picture Permit data source reports revenues only and not volumes, the Postal Service has converted Picture Permit's revenues to volumes by multiplying the dollar amount by 100. The Postal Service performs this adjustment in every price case.

B. USPS Marketing Mail

1. Summary of Price Changes

The Postal Service is increasing Marketing Mail prices by 4.203 percent overall. Prices for the seven USPS Marketing Mail products will adjust by the amounts in Table 8:

Table 8
USPS Marketing Mail Product Price Changes

Product	Percent Change
Letters	3.292
Flats	6.251
Parcels	20.493
High Density / Saturation Letters	6.180
High Density / Saturation Flats and Parcels	4.699
Carrier Route	6.209
Every Door Direct Mail – Retail	1.070
Overall	4.203

In the FY 2021 Annual Compliance Determination, the Commission found that Marketing Mail Flats, Parcels, and Carrier Route did not cover their costs. FY 2021 ACD at 50. Accordingly, under 39 C.F.R. § 3030.221, the Postal Service must raise prices for these three products by a minimum of 2 percentage points above the class average. The Postal Service is, therefore, raising prices 6.251 percent, 20.493 percent, and 6.209 percent, respectively. The Letters product, which provides 61 percent of Marketing Mail revenue, is receiving a below-average increase.

As in the previous price case, Docket No. R2022-1, High Density Letters is receiving an above-average increase. Over the last few years, comingling has changed the market for Marketing Mail and has effectively made High Density Letters a finer presort level beyond 5-Digit and Carrier Route. This increase aligns the High Density Letter prices more closely with other presort levels and represents an appropriate application of price cap authority to a mail product with stable or increasing volume, which Marketing Mail High Density Letters has exhibited for years prior to the pandemic.

DALs (public service messages) and DMLs (advertising) are separate address labels that may be mailed only with High Density and Saturation Flats and Parcels. The

DML price increases from the current 8 cents to a proposed 9 cents, an increase of 12.5 percent, while the DAL price increases from 6.5 cents to 7.0 cents, an increase of 7.7 percent.

The Postal Service is creating five new discounts for Marketing Mail flat-shaped pieces on SCF pallets, *i.e.* a pallet on which all pieces are destined to zip codes served by a single SCF, as in Table 9:

Table 9: New Discounts for flat-shaped Marketing Mail Pieces

Product	Presort Level	Per-Piece Discount (cents)
Flats	3-Digit & 5-Digit	1.4
Carrier Route	Basic CR Flats	1.1
High Density and Saturation Flats / Parcels	High Density Flats	0.8
High Density and Saturation Flats / Parcels	High Density Plus Flats	0.7
High Density and Saturation Flats / Parcels	Saturation (including EDDM) Flats	0.2

The reason for establishing these discounts, as required by 39 C.F.R. § 3030.123(h)(1), is to enable the efficient flow of SCF pallets through the network. Also, SCF palletization reduces mail processing costs and improves service times by eliminating bundle or tray handlings and sortation in facilities upstream from the destination SCF or DSCF. These discounts are based on the costs that are avoided by grouping pieces on SCF pallets.

The new discounts are similar to a series of discounts already in place for Carrier Route, High Density Flats, and High Density Plus and Saturation (including EDDM) Flats on 5-Digit or 5-Digit Scheme (Direct) containers, and the discount associated with them was called a “Direct Container” discount. The industry has requested that the 5-Digit and 5-Digit Scheme containers be referred to as “Delivery Sort” containers and

that the Direct Container discount be referred to as the “Delivery Sort Container” discount. In keeping with the industry’s request, the Postal Services will use these revised terms.

The Commission first favorably reviewed an analogous discount for Carrier Route pieces on 5-Digit pallets in 2015.⁷ In Docket No. R2021-2, the Commission approved a 1 cent discount for High Density Flats on 5-Digit pallets, noting that “this new discount will encourage efficiency by providing lower prices for High Density Flats on 5-Digit pallets, which require less processing than other High Density Flats[.]”⁸ Similarly, in Docket No. R2022-1, the Commission approved a 1 cent discount for High Density Plus Flats on Delivery Sort containers and a 0.7 cent discount for Saturation Flats on Delivery Sort containers, again noting that the lower prices for bypassing bundle operations in sorting facilities encourages efficiency.⁹

As to the analysis supporting the new discounts here, 39 C.F.R. § 3030.123(h)(2), the Postal Service extended Marketing Mail Flats and Carrier Route flats cost models, last filed in USPS-FY21-11, to estimate the costs of HD, HD Plus, and Saturation mail, providing transparency into mail processing cost drivers of mail prepared on SCF pallets and in Delivery Sort containers. The model relies on mail flows through all workshared activities. Costs are assigned to each activity using wage rates, processing productivities, and “piggyback” factors to allocate indirect costs. The

subpopulation costs are first weight-averaged by volume and then further refined by benchmarking to the appropriate IOCS-derived mail processing unit cost estimate from ACR Folder 26. The unit cost is produced using the CRA adjustment factor, as described by the following equation:

$$CRAAdjustmentFactor = \frac{IOCSCost}{ModelUnitCost}$$

The same methodology that is used to disaggregate IOCS-derived mail processing unit costs for Marketing Mail and Carrier Route presorted flats costs by rate category is used to disaggregate High Density and Saturation costs both by presort rate and containerization, that is SCF pallets, direct containers (5-Digit CRRTS pallets and CR sacks entered at delivery units), and mail prepared in all other containers.

Mechanically, the workbook included in USPS-FY21-11 has been modified as presented in file USPS-FY21-11 MM_ CR_SCF_R2023.xlsx, filed with this notice. The Postal Service has highlighted new tabs, and cells in existing tabs, for easy identification. Principally, the Postal Service has added tabs to present the disaggregated volumes of High Density, High Density Plus, and Saturation (“FY_VOLUME_HDSAT”); the entry profile (“ENTRYPROFILE_HDSAT”); and bundle sort (“BUNDLE_SORT_HDSAT”). These tabs feed the various cost and model sheets for each of the disaggregated rate categories. The modeled costs are weighted to calculate the CRA proportional adjustment factor in tab “HDSAT_ADJ_UNIT_COST,” and CRA-adjusted costs are calculated in the Excel file.

Finally, these new discounts will not adversely affect either the rates or the service levels of users of postal services who do not take advantage of them. The

discounts are generally available, and for those mailers that do not take advantage of them, all other rates still exist.

2. Workshare Discounts

Of 56 passthroughs in Marketing Mail, 30 passthroughs are equal to 100 percent, 14 are between 85 and 100 percent, 11 are below 85 percent, and 1 is above 100 percent. Because the passthroughs equal to 100 percent or between 85 percent and 100 are already compliant with 39 C.F.R. §§ 3030.283(a) and 3030.284(e), this section discusses only the remaining passthroughs.

a. Marketing Mail Letters

Within Letters (see Attachment B, Tab: 'USPS MM Letters'), there is one passthrough below 85 percent, Non-automation AADC Machinable Letters. The current discount (from the most recent price change, Docket No. R2022-1) is 1.6 cents, and the current cost avoidance is 3 cents, a starting point passthrough of 53.3 percent. The Postal Service has increased this discount to 2.0 cents, or 25 percent, well above the minimum 20 percent increase required by 39 C.F.R. § 3030.284(c). The new passthrough proposed in the instant docket is 66.7 percent, up from 53.3 percent in the previous Market Dominant Price case, as in Table 10.¹⁰

¹⁰ Docket No. R2022-1, United States Postal Service Notice of Market-Dominant Price Change, Apr. 6, 2022, at 15; Order No. 6188 at 72.

b. Marketing Mail Flats

The new discount for 3- & 5-Digit (Automation and Nonautomation) Origin Flats on SCF Pallets, discussed in Section III.B.1, above, creates a new passthrough below 85 percent (63.6 percent). This low workshare discount is permissible because it is new. 39 C.F.R. § 3030.284(b).

c. Marketing Mail Carrier Route

Within Marketing Mail Carrier Route (see Attachment B, Tab: Flats & Parcels Dropship), there is one passthrough that is below 85 percent and one above 100 percent. In the next tab: USPS MM Carrier Route, there is one further passthrough below 100 percent.

i. DNDC Carrier Route Flats

This dropship passthrough combines the piece and pound elements to derive the dollar amounts of discounts and cost avoidances to calculate the passthrough instead of using unit discounts and cost avoidance. The Postal Service increased the total discount by 21.0 percent, above the minimum 20 percent increase required by 39 C.F.R. § 3030.284(c). The new passthrough proposed is 80.5 percent, up from 66.1 percent in the previous Market Dominant price case, as in Table 11.¹¹

ii. DDU Carrier Route Flats

This dropship passthrough also combines the piece and pound elements to derive the dollar amounts of discounts and cost avoidances to calculate the passthrough. This passthrough is set at 104.9 percent under 39 C.F.R. § 3030.283(d), in accordance with the August 30, 2022, waiver granted by the Commission under 39 C.F.R. § 3030.286.¹²

iii. Origin Flats on SCF Pallets

The new discount for Origin Flats on SCF Pallets, discussed in Section III.B.1, above, creates a new passthrough below 85 percent (50.0 percent). This low workshare discount is permissible because it is new. 39 C.F.R. § 3030.284(b).

d. Marketing Mail High Density and Saturation Letters

Within Marketing Mail High Density and Saturation Letters (see Attachment B, Tab: USPS MM HD-Sat Letters), there is one passthrough that is below 85 percent. The Postal Service proposes to increase this discount by 20 percent, as in Table 12.

¹² Docket No. RM2022-12, Order Approving Postal Service Application for Waiver Under 39 C.F.R. § 3030.286, Aug. 30, 2022, (Order No. 6261).

e. Marketing Mail High Density and Saturation Flats & Parcels

Within Marketing Mail High Density and Saturation Flats & Parcels (see Attachment B, Tab: USPS MM HD-Sat Flts-Prcls), there are six discounts below 85 percent. They are discussed below separately.

i. High Density Flats on Delivery Sort Containers

The current discount (from the most recent price change, Docket No. R2022-1) is 1.2 cents, combined with the ACR2021 cost avoidance of 2.2 cents, which establishes a starting point passthrough of 54.5 percent. The Postal Service has increased this discount to 1.5 cents, or 25 percent, above the minimum 20 percent increase required by 39 C.F.R. § 3030.284(c). The new passthrough proposed is 68.2 percent, as in Table 13.

Origin Flats on Delivery Sort Containers	54.5%	68.2%	\$0.012	\$0.015	25.0%

ii. High Density Plus Flats on Delivery Sort Containers

The current discount from the most recent price change, Docket No. R2022-1, is 1.0 cent, combined with the ACR2021 cost avoidance of 2.2 cents, which establishes a starting point passthrough of 45.5 percent. The Postal Service has increased this discount to 1.2 cents, or 20 percent, meeting the minimum 20 percent increase required by 39 C.F.R. § 3030.284(c). The new passthrough proposed is 54.5 percent, as in Table 14.

iii. Saturation Flats on Delivery Sort Containers

The current discount from the most recent price change, Docket No. R2022-1, is 0.007 cents, combined with the ACR2021 cost avoidance of 2.2 cents, which establishes a starting point passthrough of 31.8 percent. The Postal Service has increased this discount to 0.009 cents, or 28.6 percent, meeting the minimum 20 percent increase required by 39 C.F.R. § 3030.284(c). The new passthrough proposed is 40.9 percent, as in Table 15.

iv. High Density Flats on SCF Pallets

The new discount for Saturation Flats on SCF Pallets, discussed in Section III.B.1, above, creates a new passthrough below 85 percent (36.4 percent). This low workshare discount is permissible because it is new. 39 C.F.R. § 3030.284(b).

v. High Density Plus Flats on SCF Pallets

The new discount for Saturation Flats on SCF Pallets, discussed in Section III.B.1, above, creates a new passthrough below 85 percent (31.8 percent). This low workshare discount is permissible because it is new. 39 C.F.R. § 3030.284(b).

vi. Saturation Flats on SCF Pallets

The new discount for Saturation Flats on SCF Pallets, discussed in Section III.B.1, above, creates a new passthrough below 85 percent (9.1 percent). This low workshare discount is permissible because it is new. 39 C.F.R. § 3030.284(b).

3. Adjustments to Billing Determinants

The Postal Service has made two adjustments to the hybrid year billing determinants for USPS Marketing Mail.

First, the Postal Service has estimated the High Density Flats, High Density Plus Flats, EDDM Flats, and Saturation Flats volume on Delivery Sort containers using the percentage numbers derived from The Marketing Mail Characteristics Study documented in USPS-FY21-12 in ACR-2021.

Second, the Postal Service has estimated the 3-Digit, 5-Digit, Carrier Route High Density, High Density Plus, EDDM Flats, and Saturation Flats volume on SCF Pallets using the percentage numbers derived from The Marketing Mail Characteristics Study documented in USPS-FY21-12 in ACR-2021.

C. Periodicals

1. Summary of Price Changes

Table 16 shows the percentage increase in prices for Periodicals:

Table 16
Periodicals Price Changes

Product	Percent Change
Outside County	4.014
Within County	7.614
Overall	4.200

The total price authority for Periodicals is 4.200 percent, and the Postal Service intends to use all 4.200 percent, banking 0.000 percent. The price changes for Periodicals approved by the Governors incorporate the following strategies aimed at improving cost coverage:

- Accepting sacks containing flats only at Destination Sectional Center Facility (DSCF), Sort and Distribution Centers (SDC), and Destination Delivery Units (DDU) to improve the operational efficiency for processing of bundles at different presort levels.
- Pricing bundles in sacks entered at facilities other than DSCF, SDC, and DDU as if they are in Mixed Area Distribution Center containers.
- Increasing editorial pound prices to recapture revenue as the makeup of pounds has shifted from advertising to editorial.
- Continuing to lower prices for tubs versus sacks to encourage more efficient mail handling.

- Maintaining the price differential between basic Carrier Route and Machinable Automation 5-Digit Flats to encourage the preparation of Carrier Route pieces and reduce costs for the Postal Service.

2. Workshare Discounts

As of this price adjustment, no Periodicals workshare discount exceeds avoided costs. While many Periodicals workshare discounts have passthrough ratios below 100 percent, the Postal Service is bringing all of them into compliance with 39 C.F.R. § 3030.284, either by ensuring that the passthrough ratio is at least 85 percent or by raising the discount by at least 20 percent, as shown in Table 17. Compliance with § 3030.284 is in bold.

3. Adjustments to Billing Determinants

Science of Agriculture Pound Prices: In order to calculate the change in prices for Science of Agriculture Pounds for Zones 3-9, the Postal Service separated Science of Agriculture Pounds from Regular Advertising pounds in the billing determinants for FY21 Q4 through FY22Q3.

Bundles volume: As mentioned above, to improve the operational efficiency for processing of bundles at different presort levels in sacks, the Postal Service is proposing to move the bundles volume in sacks entered at Origin, DNDC, and DADC to presort in MADC containers entered at Origin with container fee waived. The separation is done using MCS Data FY21Q4-FY22Q3 from updated Folder 14 for the ACR. The cells I18-I22 of tab 'RR_MCS' contain the ADC bundle volume in sacks, and the same is shown in tab 'Regular Rate Adjustments,' cells C68-C72. The bundle volume shown in

cells C62-C66 on sheet 'Regular Rate Adjustments' is the total bundle volume minus the bundle volume shown in C68-C72. The Postal Service has applied this same calculation to all other presort levels, and in tab 'Nonprofit Adjustments' and tab 'Classroom Adjustments'.

Sacks volume: The Postal Service is eliminating the entry of sacks containing flats at the OSCF, OADC, ONDC, DNDC, and DADC. These entry points will only accept sacks containing parcels. Sacks containing flats and parcels will be accepted at DSCF and DDU. The volume of sacks containing flats is, therefore, removed, except the sacks volume at DSCF Entry, DDU Entry, and all sacks volume containing parcels. The separation is done using the Shape Indicia File. Total sacks volume is shown in in cells H93:H116 on sheet "Regular Rate Adjustments." Cells J93:J116 on the same sheet show the sacks containing flats at various entry points, excluding sacks containing flats entered at DSCF and DDU. Cells C93:C116, used in calculating the before-rates revenue and after-rates revenue, show only those sacks that contain parcels entered at OSCF, OADC, ONDC, DNDC, or DADC. Sacks including flats and parcels entered at DSCF and DDU are included in cells C93:C116.

D. Package Services

1. Summary of Price Changes

Table 18 shows the proposed percentage increases for Package Services:

Table 18
Package Services Price Changes

Product	Percent Change
Alaska Bypass Service	4.205
Bound Printed Matter Flats	2.528
Bound Printed Matter Parcels	4.641
Media Mail and Library Mail	4.381
Overall	4.197

In the FY 2021 Annual Compliance Determination, the Commission concluded that the attributable costs for the Package Services class exceeds its revenue. The Postal Service is using nearly all available cap space currently to improve cost coverage, in accordance with the pricing strategy described below.

First, in order to improve BPM Parcels' cost coverage, the Postal Service is applying an above-average rate increase of 4.6 percent. In FY 2021, BPM Parcels had a cost coverage of 94.4 percent. This rate increase, in addition to the increase implemented following Docket No. R2022-1, should greatly improve BPM Parcels' cost coverage.

Next, the Postal Service is addressing the other product in Package Services that has a non-compensatory cost coverage, Media Mail/Library Mail. Media Mail/Library Mail prices will increase by 4.4 percent, which is above the class-average price increase. In FY 2021, Media/Library Mail had a cost coverage of 84.3 percent. This rate increase, in addition to the increase implemented following Docket No. R2022-1, should improve Media/Library cost coverage.

Third, BPM Flats will receive a rate increase of 2.5 percent. This rate increase is below the class-average price increase and will, therefore, balance out the Postal Service's above-average use of pricing authority for BPM Parcels and Media/Library

Mail. This BPM Flats rate adjustment is expected to provide additional revenue while maintaining healthy cost coverage for the product. The current BPM Carrier Route Flats per-piece and per-pound prices vary by entry level. The proposed prices set the per-pound prices equal for all entry levels and provide per-piece incentives for deeper entry into the Postal network. For example, the proposed per-piece prices for Carrier Route Flats entered at Origin, DNDC, DSCF, and DDU are \$1.262, \$1.147, \$0.655, and \$0.440 respectively, while the per-pound price for all of these entry points is \$0.066. This also aligns the discounts and passthroughs, which are based on per-piece prices and costs.

The final product in the class, Alaska Bypass, will receive a price increase of 4.2 percent, which reflects the average rate increase for the class.

2. Workshare Discounts

In FY 2021, no Package Services passthroughs exceeded 100 percent. Twenty-five Package Services passthroughs were between 85 and 100 percent, while three passthroughs were below 85 percent. The third category is discussed here.

The BPM Flats DDU presort will have a discount of \$0.822 from Origin entry, an increase of 0.5 percent from last rate change. With this increase, the new passthrough will be 86.4 percent.

The BPM Parcels DDU presort discount from Origin entry will be \$0.839, an increase of 2.9 percent from \$0.815. With this discount increase, the new passthrough will be 88.2 percent.

The Library Mail 5-Digit presort discount will be increased from \$1.04 to \$1.05, a 1 percent increase. As a result, the passthrough will improve to 87 percent from 86.2 percent.

All passthroughs will be between 85 and 100 percent following this rate change and therefore in compliance with 39 C.F.R. § 3030.284(e).

3. Adjustments to Billing Determinants

The Postal Service notes that there was no reported volume for the Pickup On Demand service with regards to Media/Library Mail and BPM Parcels during the entire hybrid year. Thus, the service as related to those products did not affect the price cap.

E. Special Services

1. Summary of Price Changes

Table 19 shows the proposed percentage increases for Special Services:

Table 19
Special Services Product Price Changes

Product	Percent Change
Ancillary Services	4.016
International Ancillary Services	4.411
Address Management Services	2.026
Caller Service and Reserve Numbers	4.680
Credit Card Authentication	0.000
International BRM Service	4.321
Money Orders	6.685
Post Office Box Service ¹³	4.513
Stamp Fulfillment Services	4.016
Overall	4.198

In the FY 2021 ACD, the Commission found Special Services as a class covered its attributable cost in FY 2021 and had an overall cost coverage of 141.0 percent.

¹³ This includes key and lock fees.

Money Orders was the only Special Services product for which the Commission found FY 2021 revenue was insufficient to cover its attributable cost. As directed by the Commission in the FY 2021 ACD, consistent with 39 C.F.R. § 3030.221, the Postal Service must increase Money Orders' prices by at least 2 percentage points above the class average in each market-dominant rate adjustment affecting the Special Services class through the issuance of the FY 2022 ACD. The 6.7 percent price increase here amply complies with this directive.

2. Workshare Discounts

There are no Special Services workshare discounts.

3. Adjustments to Billing Determinants

The Billing Determinants were adjusted to reflect that Signature Confirmation and Certificates of Mailing will no longer be available for returns. The specific details are provided in the CapCalc file for Special Services on the "F-12 Signature Confirmation" and "G-3 Certificates of Mailing" tabs respectively.

The Billing Determinants for Correction and Zip Coding of Mailing Lists were adjusted to reflect that these services will no longer be offered. The CapCalc file for Special Services has been changed to show this on the "J-1,2,3 Other Income" tab.

The Billing Determinants for Extended Mail Forwarding are now included in the CapCalc since it has become a permanent product. Specific details regarding volume and revenue are provided in the CapCalc file for Special Service on the "K-1 Extended Mail Forwarding" tab.

The Billing Determinants for Registered Mail Number of Handling Chargers, Certificates of Mailing Bulk First 1,000, Other Income, and Computerized Delivery

Sequence have been adjusted to reflect a new method of volume calculation.

Previously, volume was calculated by dividing the revenue from the respective products' most recent price. The new method divides the quarterly revenue by the price that was in place during said quarter.

F. Promotions

The Postal Service is offering six promotional discounts in calendar year 2023: Reply Mail IMbA (a new discount); Retargeting Mail (a new discount); Emerging & Advanced Technology; Informed Delivery; Personalized Color Transpromo; and Tactile, Sensory, and Interactive Engagement.

Three of the promotions (Tactile, Sensory and Interactive Engagement, Emerging & Advanced Technology, and Informed Delivery) apply to both First-Class Mail and Marketing Mail pieces. Personalized Color Transpromo promotion, Retargeting Mail promotion, and Reply Mail IMbA Promotion apply to First-Class Mail pieces only.

Four of the promotions being offered in calendar year 2023 were also offered in calendar year 2022. Two promotions, Reply Mail IMbA and Retargeting Mail, are new for calendar year 2023. The price cap calculations take both calendar years' promotions into account. The end of calendar year 2022 promotions is reflected in the calculations at current prices, while initiation of the calendar year 2023 promotions is incorporated into the revenue calculations at planned prices.

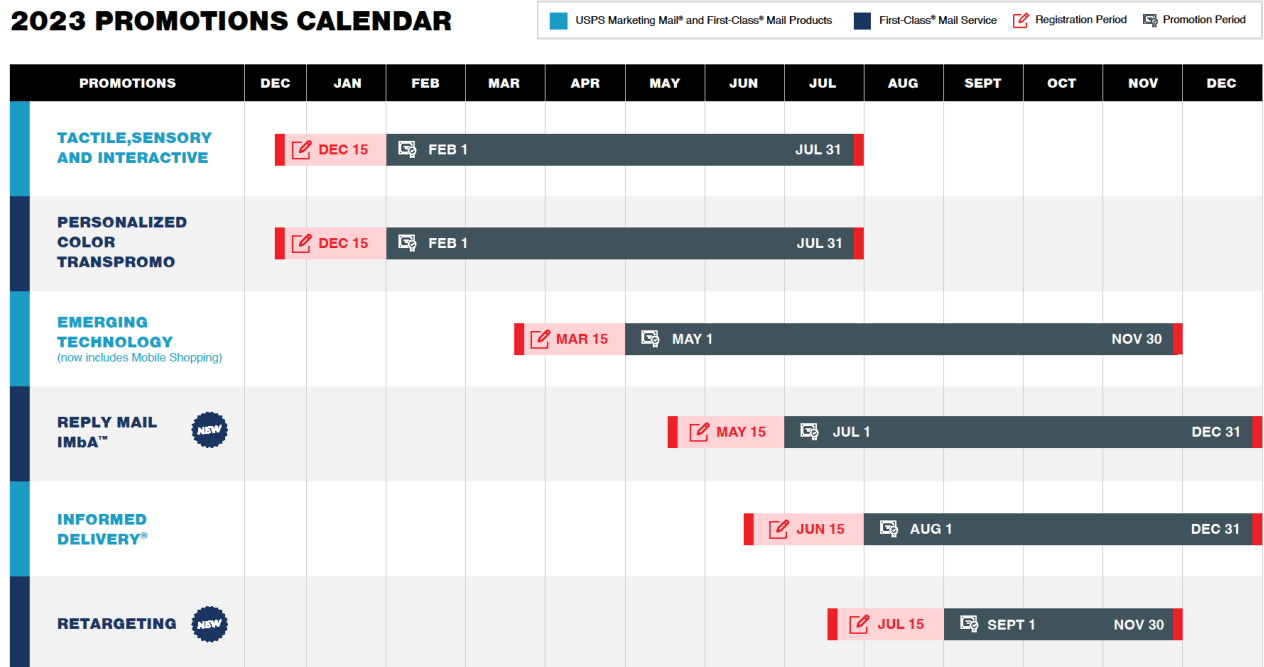

Overall, the promotions generate cap space in First-Class Mail (\$13.5 million or 0.052 percent) for the following reasons: (1) the Mobile Shopping promotion is being consolidated into the Emerging & Advanced Technology promotion; (2) the Emerging &

Advanced Technology promotion will be extended from 6 to 7 months; (3) the tiered discount for the Emerging & Advanced Technology promotion will be increased from 2 and 3 percent to 3 and 4 percent; (4) the discount for Personalized Color Transpromo that does not include Courtesy Reply Mail or Business Reply Mail will increase from 2 percent to 3 percent, and mailers will receive a 4 percent discount for Courtesy Reply Mail or Business Reply Mail inclusion; (5) the discount for the Tactile, Sensory and Interactive Engagement promotion will increase from 4 percent to 5 percent; and (6) the addition of promotions for Reply Mail IMbA (which carries a 3 percent discount) and Retargeting Mail (which carries a 5 percent discount) increase projected cap space and are not included in cap space projections.

This year's promotions also generate cap space in USPS Marketing Mail (\$28.4 million or 0.168 percent). Similar to First-Class Mail, cap space has been created due to changes to the Tactile, Sensory and Interactive Engagement and Emerging & Advanced Technology discounts.

The workpapers for both First-Class Mail and Marketing Mail include the calculations underlying the price cap figures. Classification changes associated with the promotions are shown in Attachment A. The 2023 promotions calendar is shown in Figure 1:

Figure 1: 2023 Promotions Calendar

Emerging & Advanced Technology

The Emerging and Advanced Technology promotion encourages mailers to incorporate mobile and other technologies into their mail pieces. Specifically, First-Class Mail letters, cards, and flats and Marketing Mail letters and flats that incorporate qualifying technologies will be eligible for a 3 or 4 percent discount, depending on the technology that is integrated with the mail piece. Three percent eligible technologies include Mobile Shopping, Enhanced Augmented Reality (AR), and Basic Integration with Voice Assistant. Four percent eligible technologies include Video in Print, NFC, Virtual Reality (VR)/Mixed Reality (MR), and Advanced Integration with Voice Assistant. The promotion period runs from May 1 to November 30, 2023.

Informed Delivery

The Informed Delivery Promotion seeks to continue increasing the adoption rate of the Postal Service's Informed Delivery platform by offering an upfront 4 percent discount for mailings that incorporate best practices and techniques in their Informed Delivery campaigns and a 0.5 percent incentive for the mail preparer. First-Class Mail automation letters, cards, and flats and Marketing Mail automation letters and flats that meet the promotion's requirements are eligible. The Postal Service plans to offer the promotion from August 1 through December 31, 2023.

Retargeting Promotion

The Retargeting Mail promotion will provide a 5 percent discount to mailers on qualifying postage for First-Class Mail automation postcards that are mailed in connection with website or app behavior during the established program period. Mailers must be preapproved prior to participation. The promotion will run from September 1 to November 30, 2023.

Reply Mail IMbA Promotion

The Reply Mail IMbA promotion will provide a 3 percent discount for mailers that use static IMbA on qualifying postage for First-Class Mail presort and automation letters sent during the established period. Mailers receive a 6 percent discount if they use serialized IMbA. Mailers must enroll to participate. The promotion will run from July 1 through December 31, 2023.

Personalized Color Transpromo

The Personalized Color Transpromo promotion enhances the value of First-Class Mail by encouraging mailers of bills and statements to incorporate color marketing

messaging to foster a better connection and response from their customers. The promotion is intended to increase the value of First-Class Mail and encourage mailers to invest in color print technology. The Postal Service will provide an upfront 3 percent postage discount to mailers who use dynamic and variable color print for personalized, transpromotional marketing messages on their bills and statements that does not include Courtesy Reply Mail or Business Reply Mail, and mailers will receive a 4 percent discount for Courtesy Reply Mail or Business Reply Mail inclusion.

Only First-Class Mail presort and automation letters containing bills and statements are eligible for this promotion. The Postal Service will offer this promotion from February 1 through July 31, 2023.

Tactile, Sensory and Interactive Engagement

The Tactile, Sensory and Interactive Engagement promotion encourages mailers to drive customer engagement with the mail using advanced print innovations in paper and stock, substrates, inks, interactive elements, and finishing techniques. By incorporating these print elements in a mail campaign, mailers may increase brand recognition and message recall by creating a multi-sensory experience for customers. First-Class Mail letters, cards, and flats and Marketing Mail letters and flats that meet the promotion requirements are eligible for an upfront 5 percent discount off postage during the promotion period from February 1 to July 31, 2023.

G. Preferential Rates

Section 3626 sets forth pricing requirements for certain preferred categories of mail. The Postal Service has complied with these requirements in this rate case, as explained below.

First, Section 3626(a)(3) requires that the prices for Within County Periodicals “reflect [the product’s] preferred status,” as compared to the prices for regular rate Periodicals. The Postal Service continues to recognize the preferential status of Within County Periodicals by keeping its prices below those of regular Outside County Periodicals.

Second, Section 3626(a)(4)(A) requires that Nonprofit and Classroom Periodicals receive, as nearly as practicable, a 5 percent discount from regular rate postage, except for advertising pounds. Consistent with past practice, the Postal Service maintains this rate preference by giving Nonprofit and Classroom pieces a 5 percent discount on all components of postage, except for advertising pounds and ride-along postage.

Third, Section 3626(a)(5) requires that Science of Agriculture Periodicals be given preferential treatment for their advertising pounds. Consistent with past practice, the Postal Service continues to grant these publications advertising pound rates for Destination Delivery Unit, Destination Sectional Center Facility, and Destination Area Distribution Center that are 75 percent of the advertising pound rates applicable to regular Outside County Periodicals. Advertising pound prices for Zones 1 & 2, and all other zones, are 75.1 percent of the rates applicable to regular Outside County Periodicals.

Fourth, Section 3626(a)(6) requires that Nonprofit USPS Marketing Mail prices be set to achieve an average revenue per piece that is, as nearly as practicable, 60 percent of the commercial average revenue per piece. The prices set forth in this

Notice achieve a revenue per piece ratio of 59.9 percent.¹⁴ The Postal Service is also keeping nonprofit discounts equal to the comparable commercial discounts.¹⁵

Fifth, Section 3626(a)(7) requires that the prices for Library Mail be equal, as nearly as practicable, to 95 percent of the prices for Media Mail. This is achieved by setting each Library Mail rate element equal to 95 percent of the corresponding Media Mail rate element. The Postal Service has followed this approach in setting its new prices.

Finally, Section 3626(g)(4) requires that preferential treatment be accorded to the Outside County pieces of a Periodicals publication having fewer than 5,000 Outside County pieces and at least one Within County piece. In conformance with this requirement, the Postal Service is maintaining the “limited circulation” discount that gives these mailers a discount equivalent to the Nonprofit and Classroom Periodicals discount.

In addition to a discussion of Section 3626, Rule 3010.122(g) also requires the Postal Service to discuss how its planned prices are consistent with Sections 3627 and 3629. Neither section is implicated by this rate case because the Postal Service is not altering the free rates and is not changing the eligibility requirements for nonprofit prices.

¹⁴ Details of the nonprofit-commercial revenue per piece ratio are contained in CAPCALC-USPSMM-R2022-X at Tab: “Detailed Price Change Summary.” Consistent with past practice, the Postal Service has calculated this ratio at the class level.

¹⁵ In all of the USPS Marketing Mail tabs of Attachment B, the Postal Service has added an additional column reflecting the Nonprofit discounts next to the calculation of Commercial discounts.

IV. MCS Changes

As required by 39 C.F.R. § 3030.124(d), this notice is accompanied by a schedule identifying every change to the MCS that will be necessary to implement the planned rate changes. Attachment A shows the new rates and related product description changes incorporated into a revised draft of the market-dominant section of the MCS.¹⁶

Pursuant to 39 C.F.R. § 3040.190, the United States Postal Service (Postal Service) hereby gives notice of minor changes in classification governing International Mail to the Mail Classification Schedule (MCS), specifically concerning a country name change from “Turkey” to “Türkiye.” The purpose of these minor modifications is to improve the accuracy of the product descriptions in the MCS by making changes to the country price list for international mail that appears in Part D of the MCS, in accordance with a formal request made through the Universal Postal Union via *International Bureau Circular* 141, dated August 15, 2022. The Postal Service proposes that these minor changes should take effect on January 22, 2023, simultaneously with the implementation of the market-dominant published price change that is the subject of this notice. This notice of a minor classification change concerning a country name change satisfies the requirements set forth in 39 C.F.R. § 3040.190.

First, in accordance with 39 C.F.R. § 3040.190(a), the changes described should result in the MCS more accurately representing the Postal Service’s current offerings

¹⁶ Attachment A is based on the June 30, 2022, MCS draft published by the Commission at <https://www.prc.gov/mail-classification-schedule>, updated to include the changes made in Docket No. R2022-1, Order on Price Adjustments Etc., May 27, 2022 (Order 6188). The classification changes planned in this filing are shown in legislative format.

and should allow mailers to locate pertinent information more precisely. Second, in accordance with 39 C.F.R. § 3040.190(b), the Postal Service is filing this notice no later than 15 days prior to the intended effective date of January 22, 2023, for the proposed changes to the MCS. Third, in accordance with 39 C.F.R. § 3040.190(c), these changes merely make revisions concerning one possible destination for certain products listed in the MCS without otherwise changing those products or the prices or price groups applicable to such products. The proposed modifications do not significantly change the user experience for any product and there is no evidence that the proposed modifications will significantly impact competitors that offer a similar service.

V. Library References

The Postal Service is filing 6 public and 1 nonpublic library references to support this case. Brief descriptions of the library references are contained in the accompanying notices filed with the Commission today. Each library reference contains a preface that explains its contents in more detail.
